Corrigendum: Critical assessment of pile modulus determination methods

Carlos Lam and Stephan A. Jefferis

Ref: Can. Geotech. J. 48(10): 1433–1448 (2011).

On page 1435, in Table 1, the stress–strain (σ – ϵ) relationship assumed by the tangent modulus method (Fellenius 1989, 2001) should be $\sigma = 0.5a\epsilon^2 + b\epsilon$.

Received 16 March 2012. Accepted 16 March 2012. Published at www.nrcresearchpress.com/cgj on 30 April 2012.
