Omolade Femi-Ajao, PhD

Introduction
- Domestic violence and abuse against women is a global public health problem, and getting people to talk about their experience is a challenge.
- Limited research evidence exists on the role of community groups and faith-based organisations in helping women from developing countries residing in developed countries.
- This study focuses on disclosure and help-seeking practices among Nigerian women resident in England.
  - Nigerians in the UK are the largest Black African population.

Objectives: to
- Increase participation in research among ethnic minority groups
- Engage community groups and faith-based organisations in public health research
- Increase recruitment rates

Methodology
1. Targeted Sampling Techniques (Watters and Biernacki, 1989)
   - ethnographic mapping.
2. Convenience Sampling Technique

Overview of Sampling Techniques

Targeted Sampling
- Led to the identification of 10 Nigerian organisations/groups, and No Recourse to Public Funds Team at Manchester City Council

Convenience Sampling
- Nigerian groups, contacts, organisations
  - No Recourse to Public Funds Team, Manchester City council

Result:
- Increase in the number of research participants.
- Enhanced engagement with the research process and support.
- Community groups and faith-based organisations are avenues for recruiting research participants.

Discussion:
- When conducting research with immigrant communities, especially on sensitive topics, there is need for a combination of strategies to ensure participation.
- Community groups and faith-based organisations are essential components of public health research among immigrants.

Conclusion
- There is need for collaboration between community groups, faith-based organisations, voluntary sector organisations, and statutory services on supporting women from ethnic minority populations experiencing domestic violence and abuse.

Key terms:
- Ethnic minority populations
- Targeted sampling
- Ethnographic mapping
- Community groups
- Faith-based organisations
