

Christopher Conselice
Academic (Teaching & Research) Professor
Astronomy and Astrophysics Theory Group

Overview

Christopher J. Conselice is a Professor of Extragalactic Astronomy at the University of Manchester whose research is focused on galaxy formation and evolution through cosmic time. He works with space and ground-based data and computer simulations to determine how galaxies have formed from the earliest epochs in the universe until today. He has led several large HST surveys including the GOODS NICMOS Survey (GNS) and is a founding member of other large surveys including CANDELS and GOODS.

He is the PI of the Advanced ERC grant, EPOCHS, designed to study the first galaxy formation at the epoch of reionization based on James Webb Space Telescope Data. He is also the lead editor of the "Galaxies and Cosmology" corridor for the Astrophysical Journal and AAS Journals.

He maintains a web site on his popular writings called "The Astronomer's Notebook"

Prof. Conselice joined the University of Manchester in 2020.

Employment

Professor of Extragalactic Astronomy

Academic (Teaching & Research) Professor

Astronomy and Astrophysics Theory Group

The University of Manchester

1 Aug 2020 → present

Lead Legacy Scientist

Euclid Consortium

Visiting Professor

University of Nottingham

Nottingham, United Kingdom
